

Legacy Crew Cab Helmet Hardtop®

HMMWV (available for 2-door)

For excellent weather protection our 2-Door Crew Cab is an ideal solution.

This shelter features the weather sealing, head room, and noise reduction attributes that are appreciated with our standard tops. This cab variant provides the flexibility of an open cargo area or attachment of canvas cargo cover configurations. Access to the cargo area is made available by our optional aluminum bulkhead sliding doors.

- ✓ **Permanent Solution to Canvas**
- ✓ **Lightweight System**
- ✓ **Excellent Weather Protection**

General Description

Our streamlined design features over 9" inches of additional driver/passenger headroom in comparison to OEM canvas tops. This extra space allows ample clearance for PPE and combat load equipment.

Our customers appreciate the weatherproof interior environment, with far superior protection vs. canvas soft tops from water and dust intrusion along with reduced road noise.

Our design allows for easy installation and removal. McClarin's simplistic mounting system uses a basic angle bracket system designed to allow rapid installation with minimal vehicle preparation. The Helmet Hardtop® has been designed to be mounted on the HMMWV at unit-level shops.

When our personnel doors are utilized, the complete HMMWV can be secured. The 2-door Crew Cab comes complete with a reinforced bulkhead wall that seals to the cargo bed floor. An optional aluminum bulkhead with sliding doors allows access to the cargo area.

Specifications

Top Dimensions

Length:	37 inches
Width:	85 inches
Height:	45 inches
Weight:	200 lbs.

Crated Dimensions

Length:	54 inches
Width:	91.5 inches
Height:	48 inches

Custom Development

McClarin Composites' Military Products division provides custom solutions to satisfy new requirements emanating from new technologies and combat applications. OEM and prime defense contractors have called upon our engineers to design vehicle tops that protect a variety of systems used by Soldiers and Marines. McClarin's Military Products have previously been used in numerous programs including PROPHET, CESAS, CONDOR, TPCS, and BCOTM.

Custom Helmet Hardtops®

Custom engineered Helmet Hardtops® can be designed specifically for a program's unique requirements. Sensitive electronic equipment can be serviced and protected from rain, dust, and extreme conditions.
